PROJECT WORK

1. Kake WebApp | Maynooth University Final Year Project

In progress (2022/23)

Outline: Full Stack Development for a cake/dessert start up business '[kakedessertdelivery](#)'.

Key Skills attained:

- Front-end & Back-end Languages & Frameworks html, js, css, NodeJS & React.
- Database management systems Firebase with version control systems such as GitHub.
- Strategic planning (plan the design, development & implementation phases).
- Time management skills, constant progress tracking with supervisor weekly meetings etc..
- Working with Web Hosting platforms, API development, servers...

2. Track any device on the Internet | Personal

January (2022)

Outline: Finding location of a targeted (Mobile device, Computer etc)

Key Features :

- Sending a link to the website utilizing the domain associated with a self-made html website hosted by 000webhost.
- JavaScript is used to obtain location (coordinates) as soon as the user loads the page.
- After the html file has been run, PHP is used to accept a get request, which instructs it to produce a new txt file containing the location of the targeted device.
